

Let your system evolve through phases

AIR CANADA

New Air Canada Cargo facility at Pierre Elliot Trudeau Airport, Montréal (YUL), Canada

Due to major changes of the facilities at Montréal Airport, a new 16,000 m² cargo terminal was built in the North Cargo Complex for Air Canada Cargo and put into operation in November 2008. Resulting from the contract signed in April 2008, SACO supplied and supervised the installation and commissioning of the ULD handling and storage system with approx. 200 powered roller decks, including:

- 2 Transfer vehicles 20ft
- 15 Friction powered storage decks (10ft positions)
- 30 Friction powered storage decks (2x 10ft positions)
- 2 Ball deck areas for flight staging
- 11 Right angle decks (RAD)
- 6 Turntables with integrated RAD and weighing system
- 10 Drive-over lowering workstations 10ft with weighing system
- 1 Drive-over lowering workstation 20ft with split operation (2x 10ft) facility and weighing systems
- 80 Motor powered roller decks
- 22 Motor powered spacer roller decks
- 2 Truck docks 20ft with pop-up ball units, winch, and weighing system
- 6 Stand-alone floor scales (5ft / 10ft / 20ft)
- Slave pallet system

Pallet Masters with integrated weighing system at AviaPartner Cargo in Liège (LGG), Belgium

The SACO slave pallet system consisting of 100 slave pallets and 2 pallet masters was supplied in phases to APCL's new cargo facility in Liège in April and November 2008.

The system enables a very versatile and flexible handling of ULD's with slave pallets being used for build and break activities as well as for manoeuvring from airside to landside.

The Pallet Masters with unique integrated weighing system have been tested in practice under the most adverse conditions and have proven to be most efficient, accurate and reliable. ULD's on slave pallets are weighed directly after being built so that the weight information can be processed for weight & balance planning well in advance of actual aircraft loading.

The weighing system with electronic load cells is designed in such a way that it can not be damaged during typical heavy warehouse usage with risk of frequent collisions. Nor is the weight result affected by operating temperatures or position of the load on the forks as often seen with other (hydraulic) weighing systems. The weight indicator is powered by the main battery and is fitted with zero, tare and print functions.

ULD Handling System for World Flight Services in Copenhagen (CPH), Denmark

Worldwide Flight Services has again contracted SACO to supply a ULD handling system, this time for the expansion of their facilities in Copenhagen as part of their rapid European expansion plans.

The system installed in September 2009 includes a 20ft Truck Dock with safety pit covering and roller tracks with right angle decks and integrated weighing system.

SACO Airport Equipment will be exhibiting at the Inter Airport Europe 2009

Following years of tradition, SACO will again be exhibiting as part of the Netherlands Pavilion.

Please feel free to visit us on our Stand 360 in Hall B6. Our colleagues will be there daily to inform you about developments, to exchange ideas and to assist you with your plans. We look forward to meeting you in person.

ETV system for perishables cargo terminal in Ethiopia

SACO has been awarded a contract for the supply of the ULD handling and storage system for Ethiopian's new cargo operation at Bahir Dar International Airport (BJR) near lake Tana in the north of the country. The facilities will be dedicated to the handling of export perishables and will include cooling and refrigeration equipment, truck docks at landside, overhead and slide doors, lowering workstations, weighing systems, motor powered roller decks, ETV storage system with friction powered storage roller decks, and dolly docks at airside.

We would be most pleased to meet you at the following events:

- | | |
|---|-----------------------|
| • Inter Airport Europe, Munich | 06 - 09 October 2009 |
| • Ground Handling Int. Conference, Sorrento | 16 - 18 November 2009 |
| • Airport Show, Dubai | 25 - 27 April 2010 |
| • Air Cargo Handling Conference, Brussels | 15 - 16 June 2010 |
| • TIACA Air Cargo Forum (ACF), Amsterdam | 02 - 04 November 2010 |
