

Airport Stillage & Decking Systems.

- Stillages can be equipped with Integral electro – hydraulic elevators.
- Added benefit of reducing cost of ULD repairs
- Various Heights and Sizes of stillages can be designed to customer needs.
- Ball Mat Transfer Areas can front the storage lanes to allow aisle selection and easy maneuvering.
- Roller Storage lanes can be installed with Non – Slip walking surfaces throughout the system

To Prepare a quote we would need the following details:

- The Area you have available which will need to be on a concrete base
- How Many ULD you may be intending to store.
- The type of ULD's you will be storing.
- Are ULD's delivered to the store on Dollies.
- Would you require a truck dock or scissor lift system built into the store
- Would you require a lighting system install as per picture 1.
- On certain systems local authorities would require you to have a Roof & Cladding Installed, Viking Airport Equipment can also quote for this.
